Submitted By:
Approved By: Leon Miller

During the past few months, conversion of the catalogs format from OS/CVOL to VSAM/ICF has proceeded at a pace that has not allowed much time to be spent on catalog maintenance. Consequently, many items exist which are either improper or invalid.

An example of the kind of data that needs to be cleaned up is the quantity of ALIAS entries which are not associated with any physical data sets. Approximately twenty percent of the ALIASES defined in the master catalog are not valid.

The attached list shows which ALIASES do not reference data sets. These entries will be deleted from the master catalogs on August 28, 1987. If you have questions concerning this action, or need an ALIAS to remain, contact Jim Brown at 533-4290 or Linda Tisdale at 533-5251.
